ABOUT

Computer Science student and front-end developer based in Fayoum, Egypt. Focused on interface engineering with close attention to detail — transitions, spacing, and how a UI responds to the user. Works primarily with HTML, CSS and JavaScript, with an emphasis on motion design and cross-browser polish.

SKILLS

Languages & Markup	HTML5, CSS3, JavaScript (ES6+)
Frameworks & Styling	React, Tailwind CSS, Responsive Design
Craft & Tooling	Motion & Micro-interactions, Git & GitHub, Cross-browser QA

PROJECTS

Essence

HTML5, CSS3, E-commerce

Full luxury fragrance storefront — product catalog, dark mode, cart, checkout flow and auth pages, built as a cohesive multi-page e-commerce experience.

github.com/YSabbahy/Essence-project

MATCHDAY

HTML5, CSS3, E-commerce

E-commerce storefront for club and national team football shirts, retro and modern kits, with cart, checkout and dark mode.

github.com/YSabbahy/MATCHDAY

Kemet Protocol

CSS3, JavaScript, Interactive

Sci-fi terminal interface over ancient-Egyptian history — decoded data-archive files on the Sphinx, the pyramids and the Rosetta Stone, with an in-page AI chat, sound and animated stats.

github.com/YSabbahy/Kemet_Protocol

OrbitaX

Tailwind CSS, Landing Page

Sci-fi space-tourism landing page — pricing tiers, crew profiles, testimonials and a live mission-timeline section.

github.com/YSabbahy/OrbitaX

EDUCATION

B.Sc. Computer Science — Fayoum University (in progress)
